

Suncrest Inverter & Storage Brochure

Suncrest Energy Systems - Ahmedabad, India - suncrest-energy.example

> Fictional company. All figures in this brochure are illustrative demo data.

Power conversion, storage and intelligence from one partner

Suncrest Energy Systems designs and manufactures the equipment that sits between solar panels, batteries and the grid. With a 9 GW installed base across India, the Middle East, Southeast Asia and Southern Africa, and 40 service hubs, we help IPPs, utilities, EPC contractors, manufacturers and data-centre operators build plants that are bankable, grid-compliant and easy to operate.

One vendor for inverters, storage and monitoring means one warranty, one service number and no interface disputes during commissioning.

Product line-up

StringMax 110-350 kW string inverters

- Up to 12 MPPTs and 99.0% peak efficiency
- IP66 enclosure, rated for 60 C ambient and heavy dust
- Built-in string-level monitoring and anti-PID
- Ideal for C&I rooftops and distributed utility-scale layouts

CentraSkid 3.4 MW central inverter station

- Inverter, MV transformer and ring main unit on a single factory-tested skid
- Delivered plug-and-play to reduce on-site work by up to 40%
- Designed for utility-scale solar parks and wind-solar hybrid plants

VaultBESS containerised battery storage

- Lithium-iron-phosphate blocks from 1 MWh to 5 MWh per 20-ft container
- Integrated PCS, liquid cooling, fire detection and suppression
- Applications: peak shaving, solar firming, frequency regulation, backup power
- 10-year / 6,000-cycle warranty with 70% end-of-warranty capacity guarantee

HybriCharge hybrid inverter (30-150 kW)

- Solar, battery and EV-charger interfaces in one unit

- Built for malls, office parks, hospitals, logistics parks and fleet depots
- Add storage or DC chargers later without replacing the inverter

SunSight energy-management platform

- Real-time monitoring of every inverter, string and battery rack
- Generation forecasting and automated BESS dispatch
- Tenant sub-metering for commercial real estate
- One-click Scope 2 carbon reports for sustainability teams

Who we serve

Segment	Typical project	Suncrest solution
IPPs and EPC contractors	50-1,200 MW solar or hybrid parks	CentraSkid or StringMax, VaultBESS, SunSight
Utilities and DISCOMs	100-500 MWh standalone storage	VaultBESS with GridForm PCS
Manufacturers	1-40 MW rooftop and captive solar	StringMax, VaultBESS, SunSight Optimise
Data centres	20-120 MW IT load campuses	VaultBESS for UPS replacement and peak shaving
Commercial real estate and fleets	Rooftop PV plus EV charging	HybriCharge, SunSight

Grid compliance you can bank on

Every Suncrest inverter and PCS is tested to IEC 62109, IEC 61727 and IEC 62116 and meets Indian grid-connectivity requirements including low- and high-voltage ride-through. Export variants are certified for Gulf utility connection codes and the South African renewable grid code. VaultBESS is tested to UL 9540A. Lenders and owners' engineers receive full test reports on request.

Service that keeps plants running

- 48-hour inverter replacement anywhere in India
- Suncrest Assured O&M contracts with availability guarantees of up to 99%
- Remote diagnostics through SunSight, with most faults resolved without a site visit
- Local-language support teams in Gujarati, Hindi, Tamil, Marathi, Arabic and Vietnamese

Warranty at a glance

- StringMax and HybriCharge: 5 years standard, extendable to 15
- CentraSkid: 5 years standard, extendable to 20
- VaultBESS: 10 years or 6,000 cycles

Made in India, built for the world

Our Sanand manufacturing campus produces 6 GW of inverters and 3 GWh of storage systems a year, helping customers meet domestic-content requirements in public tenders while keeping lead times predictable.
